SIGNIFICANT DOCTORAL RESEARCH

I completed doctoral course work, passed the comprehensive examinations, and completed a dissertation in the Instructional Design and Technology Program at the University of Pittsburgh. All course selections emphasized instructional design and technology issues. Having a strong computer background together with excellent courses has afforded me valuable experiences in CAI application and theory, and in applying instructional design principles to the teaching and learning of computers, computer/software packages, program languages, and other technically and non-technically related subjects. A brief review of my doctoral course work research, including significant coursework papers and presentations, follows.
